

Car Service Kit

The Car Service Kit is a pack of fire blankets specially developed for towing companies and garages.

It is a simple and cost-effective way to ensure the safety of damaged electric cars during transport and storage.

Composition : silicone-coated fiberglass fabric

Heat resistance : up to 1 300°C.

To avoid a possible fire, the damaged vehicle is safely packed in the VLITEX Car Service Kit.

It offers multiple protection: leaking liquids are contained and in case of a fire, the environment is not affected and smoke development is considerably reduced.

Step 1

Spread the bottom cover and place the vehicle on it. Attach the wheels.

Step 2

Protect the vehicle with the fleece. Place the second cover on the vehicle.

Step 3

Fold down the bottom cover. Attach the straps and the metal clips.
